ABOUT

An avid software developer with a love for solving problems and automating tasks. With over 4 years' experience programming, have worked with multiple frameworks and technologies during the journey.

PROJECTS AND WORK EXPERIENCE

Code Sensei
Code Ninjas
- Worked at Code Ninjas as a Code Sensei teaching young teens programming with hands on guidance and project-based learning.

Personal Website
Creator
- Own website written from scratch with a back-end in Python Flask.

App Limiter app
Creator
- Utilized Python's PYQT5 framework to develop an efficient and user-friendly windows GUI application that boosts user productivity by enabling them to limit how long they spend on selected apps.

Discord Bot
Creator
- Written in JavaScript (NodeJS), created a bot that is currently used in 250+ servers that enables server owners to efficiently moderate and handle members within their server.

- Uses Discord's API and implements an SQLite database to efficiently store and retrieve user currency, badges and other data for over 18,000 users.

- Implements multiple mini games to keep server members entertained.

SKILLS

- HTML / CSS
- React
- SQL (SQLite, MySQL)
- JavaScript (Node)
- Python (Django, Flask, PyQT5)
- .NET (C#)
- REST API
- Git

EDUCATION

- University of Houston, Houston, TX
- Houston Community College, Houston, TX
